Subject: RE: Acknowledgments - Pollinators

Jen,
For Pennsylvania State University I have listed as Penn State for USDA, Greg is right. The contribution didn't come from Penn State it actually came from USDA and Penn State was only the pass through.
I do not show that we ever received any money from the French Ministry of Agriculture or the North American Pollinator Protection Campaign (NAPPC). I have no record of them. Other than that everything else is good.

Thanks for asking, Jen. I do have a couple corrections/possible additions.

I have listed for the Pollinators Partnership -- Coevolution Institute (Pollinator Partnership) – and from link I think Pollinator Partnership is OK (no s on Pollinators though).

Also have Project Apis m. on my list and that how it appears on their website

Should we add /Chemicals Regulation Directorate to the Health and Safety Executive? That was specific source of funding (secured by Mark Clook) but HSE listing is probably sufficient.

Valent U.S.A. Corporation is how they list themselves on their website

I think ICPER is ICPBR and could be written out as International Commission For Plant Bee Relationships

For Pennsylvania State University I have listed as Penn State for USDA. USDA must have routed their funding through the university so perhaps we need to add USDA separately to the list just to be safe?

Teresa should take a look at this too.

Greg

Hi Greg,

Getting to the last of the page proofs, and I wanted to check with you on the financial contributors to the book. It is my understanding that there were two distinct "batches" of contributors, and I would hate to leave anyone off. For example, the North American Pollinator Protection Campaign (NAPPC) is missing from this list. Can you please have a look at your record of funders and compare it against this list? Very much appreciated.

All the best,
Jen

Pollinators Partnership
BASF Corporation
Bayer CropScience
Dow AgroScience
Monsanto Company
Project Apis (TOM – Wiley added an "m." so it reads Project Apis m. - is that acceptable?)
Syngenta
US Environmental Protection Agency
Valent USA Co.
Health and Safety Executive
ICPER
Julius Kuhn Institut
French Ministry of Agriculture
Pennsylvania State University
